1989

Start by
Hans-Joachim Reißmann

1993

Founding of Reissmann
Sensortechnik GmbH

1994

New building in
Rosengarten
in Schollenäcker

2011

New building with approx
2000m² in Rosengarten

2014

Markus Storz becomes
owner and
managing director

2021/22

Expansion by approx
1500m² in Rosengarten

REISSMANN

30+

Years of experience

150+

Employees at both locations

Innovations, progressive thinking and very well qualified specialist staff guarantee that **REISSMANN** Sensortechnik GmbH will continue to be the **right contact** for electrical drive technology in the future.

For the special application some of our products are **UL-certificated**.

For the area of application of development, production and distribution from:

Sensors for temperature, electric equipment components for the drive-, current-and level technology as well as for the cable manufacture a quality- and environmental management system is introduced and effective by:

REISSMANN

Everything from a single source

We offer a wide range of technologies and services.

Expertise that makes a difference!

Electronic device technology

for drive technology

Cable assembly

Cable processing for different types of cable and of insulation

Sensor technology

for temperature, flow and level monitoring

REISSMANN

Tailored customer solutions

Where do your requirements align with our range of services?
Let's start a conversation – and turn ideas into **concrete solutions**.
Precise. Actionable.

3D printing

for the production of realistic components
tailored to your application

Plastics Technology

in various versions

REISSMANN Complete Solutions

Project Planning | Development

Using state-of-the-art CAD technology in project planning and development, we create innovative product solutions – precisely engineered, future-focused, and virtually limitless in their possibilities.

in operation:

- Solid Works “professional”

Plastics Technology

in various versions

REISSMANN Complete Solutions

With our laser marking technology, your products are marked with lasting precision and exceptional quality. The result:

Clear, permanent identification that ensures quality, **traceability**, and a **professional finish**.

Laser Marking

Precision in every detail

REISSMANN Complete Solutions

We provide high-quality pad printing for the **customized marking** of your products – precise, flexible, and tailored to your specific requirements.

Pad Printing

precise and customized

REISSMANN Complete Solutions

REISSMANN

Our **professional post-processing** of bearing labels ensures maximum precision, optimal functionality, and long-lasting quality.

Post-Processing

Quality in every detail.

REISSMANN

State-of-the-Art Soldering Technologies

Precision Soldering Solutions from a Single Source:

Robotic soldering, wave soldering (THT assembly), and hand soldering – tailored to meet every requirement.

REISSMANN Complete Solutions

REISSMANN

With our **professional layout design services** for equipment engineering, we lay the foundation for efficient and structured manufacturing processes.
Custom-designed and precisely implemented.

Layout Design

with Target 3001 and assembly

Converter

Field module IP68

Electronic device technology

Start Capacitor Relay

Nonexpendable, electronic Start Capacitor relay for extreme temperature application up to 80°C

80 ... 120V AC Operating Voltage
110 ... 230V AC Operating Voltage
15A switching current

Electronic device technology

TMS-Basic

For guaranteed safe monitoring of motors, transformers, etc., in combination with PTC, KTY, or PT sensors.

Adjustable cut-off temperature
70°C to 160°C.

Electronic device technology

Converter

A full replacement for the discontinued KTY 84.../83... temperature sensors.

All Pt sensor signals are converted into a simulated KTY 84.../83... signal.

Electronic device technology

Brake rectifier

according to individual customer specifications

Electronic device technology

Varistors

according to individual customer specifications

Electronic device technology

Current relay

according to individual customer specifications

Electronic device technology

TMS-LB

For guaranteed safe monitoring of motors, transformers, etc. in conjunction with PTC-, KTY or PT-sensors

Electronic device technology

Flow monitor

according to individual customer specifications

REISSMANN

Efficient Cable Assembly

Featuring modern automatic cable cutting machines with **single- or double-sided crimp contact** stops for efficient, reliable manufacturing processes.

Cable assembly

Cable assembly

Fan module

according to individual customer
specifications

Cable assembly

Resolver

according to individual customer
specifications

Cable assembly

Special cable assembly

Processing, including crimping, of wires with a cross-sectional area ranging from AWG 30 / 0.57 mm² up to 70 mm²

REISSMANN

Complete Solutions

Through precise analysis and inspection of the crimp connections, we ensure reliable results—**quickly, efficiently, and right here in-house.**

Microsection laboratory

Accuracy & Quality

Cable assembly

Technical cable assembly

for sensor bearings

Cable assembly

Heaterbands

Silicone-free – harmful fumes are no longer an issue.

Sensor Technology

Hall-Sensors

for speed measurement and
rotation detection

REISSMANN

Resistance Welding process

Hall sensors using the resistance welding process - for durable, secure connections that **eliminate contact resistance**. With our **two-point micro-welding machine**.

Connection Technology

Maximum reliability for demanding applications.

Sensor Technology

Pt100

Grooves resistance

Sensor Technology

Thermocouples

according to individual customer specifications

Sensor Technology

NTC

Temperature sensor (NTC) in
stainless steel sleeve

Sensor Technology

Temperature Sensor

PTC | NTC
suitable for general-purpose
applications

REISSMANN

Custom design? No problem

Special-purpose temperature sensors for saltwater-resistant temperature control in plastic housings - **all types of temperature sensors.**

Special version

Count on quality, reliability, and customized solutions.

Thank you very much for your attention
